CASHIERING MODULE (ACCOUNTS RECEIVABLE)

Our complete cashiering module is designed to handle in-house guest as well as non in-house guest transactions. The cashiering module handles the bills and taxes automatically. All transactions are able to be traced and audited. It can produce reports for different transaction types which makes it easier for the management to manage billings and receivables.

MOTHER CARE MODULE

This module keeps track of the mother's (daily / predefined intervals) vitals signs and doctor's visits remarks and actions taken. The maintains the history data and able produce these vitals signs reports for the period of stay.

BABY CARE MODULE

Allows the nurses or caregivers to enter and monitor the baby's vital signs including serum bilirubin levels (daily / predefined intervals). It also comes with another sub-module for the baby's feeding history, bowel movements monitoring and etc. This will be very useful for the visiting doctors for assessments and consultations.

FOOD & BEVERAGE MODULE

Be it if you're running your own kitchen or outsourced, this module comes in real handy as it takes care of meal items, nutritional facts, meal menus and even the costs. It also comes **Meal Selection Management Module** for easy meal selection entry for each meal (Breakfast / Morning Snack / Lunch / Tea-Time / Dinner / Supper) on a daily basis, weekly or through out the stay. Food preparation will be super easy with meal selection list / report.

LAUNDRY MANAGEMENT MODULE

The laundry module helps the centre to monitor and manage all out-going laundries. It keeps track of the outward batches, quantity of each item, costs and expenses. It also comes with discrepancy reports on returned items and etc.

PROSPECTIVE CUSTOMER MODULE (SALES & MARKETING)

This module allows the centre to enter prospective / interested potential customer details and information which will be useful for marketing, promotion and event purposes.

RESERVATIONS MODULE

Our reservations module is designed with dynamic management of rooms availability and occupancy. It comes with the centre's performance forecast that will be a superb tool to achieve the sales targets and marketing objectives and performance.

FRONT DESK MODULE

The centre's heart and backbone is the front desk. With that in mind our Front Desk Module has been designed with complete features to manage the day to day operations of the centre. This will help increase the centre's productivity and reducing paper works which allows staffs to channel their resources on services, business operations and enhancing guest experience. The module comes with flexible option for length of stay, change of room type with different rates are automatically taken care of the system, extended stay with charging conditions and etc. Integrated with powerful Guest History module allow users to easily retrieve past guest records for future reference or marketing.

HOUSEKEEPING MODULE

The Housekeeping module is one of the most easiest yet effective tool in managing your center's daily housekeeping operations such as room turnover, additional guest requests and etc. It keeps track of the time taken to turnover a room. This will ensure in maintaining prompt and excellent quality services.
