A photograph of a modern hotel lobby with a curved reception desk, decorative lattice walls, and staff members in red uniforms. A man in a suit is walking towards the desk.

BOCS Hotel Management Software

A hotel system designed for hoteliers by hoteliers

Designed for
small | medium | boutique | budget hotels

BOCS Hotel Management System is specifically designed to cater for small, medium, boutique and budget hotels category. We have been providing this solution since 1996.

The system is made to be simple and easy-to-use yet without compromising its performance and features needed to run a small or medium scale hotel business operations.

With our 24/7 support and integrated modules, it is a value-for-money software solution for any organization of any size.

NIGHT AUDIT MODULE

Closing of the day is as easy as just a mouse click away, yet comprehensive routine which closes your day and automatically posts the day's transactions into the guest folios seamlessly. Night Audit process automatically produces all relevant reports without the hassle to print manually.

HOUSEKEEPING MODULE

Our Housekeeping module is one of the most easiest yet effective tool in managing your hotel's housekeeping department and its operations.

TELEPHONE CALL BILLING MODULE

Our Telephone Call Billing module is an integrated tool which takes care and automatically posts the hotel guests' room telephone usage into the respective folio without a hassle.

RESERVATIONS MODULE

Our reservations module is designed with dynamic rates, yield management based on occupancy, group management, prospecting, wait lists, extensive repeat history, and all the functions you need for a first class reservations department.

FRONT OFFICE MODULE

The front office system provides easy and efficient data-entry method specifically designed to reduce check-ins and check-outs, these increases your staff's productivity without compromising the essential business operations. Coupled with powerful Guest History module allow users to easily retrieve past guest records.

CASHIERING MODULE

Our dynamic cashiering module is designed to handle in-house guest as well as non in-house guest transactions. All transactions are able to be traced and audited. It can produce reports for different transaction types which makes it easier for the management to better understand and manage the billings and receivables.
