# Why BOCSCAIS?

BOCS Call Accounting Interface System for Hotel / Motel is the hospitality telephony system specially designed to interface with any PABX system for hotels / motels. BOCSCAIS is proven technology that provides the hospitality features needed to meet both the management and guests' expectations and also requirements.

This fully integrated computer and specialized software turns your front desk into a comprehensive hospitality management system. Advanced features such as, guest names, complete call accounting, room audits and an array of available reports, make the BOCSCAIS a powerful management system. With built-in Call Accounting, costing of calls is readily available at all times. A flexible but easy to use method of adding markups, surcharges and tax is available. BOCSCAIS also comes with an optional (Network Version), this enables multiple terminals at a front desk. This allows several users to use the system at the same time on the same system.

The system comes with a superb itemised billing option, separate bills for Rooms Charges and Telephone Usage. BOCSCAIS is also equipped with complete multi-criteria reports on guest's telephone calls, charges (marked-up) and room charges. The system also provides administrations calls and usage activity listings (without mark-up).
